PERSONAL PROJECTS

Project: TEXT TRANSFORM
Description: Utility Web App built in react for transforming text into different formats such as binary and performing actions such as removing extra spaces predicting expected time of readi ng,I have also added a theme switcher using this user can see the application in different colors other than dark mode
Technologies: Reactjs,Bootstrap,Git

Github Link: https://sonooo.github.io/learnreact/

Project: ECOMMERCE APPLICATION FOR ONLINE TSHIRT STORE WITH PAYMENT GATEWAY
Description: I have developed an online t-shirt selling application, utilizing Node.js and Express.js for the back-end, and MongoDB as the database. Authentication is implemented using JWT, and Braintree serves as the payment gateway. The front-end of the project is built with ReactJS, enhanced with Bootstrap for improved aesthetics and responsiveness.
Technologies: MongoDB, ExpressJs, Node.js,Reactjs,Bootstrap,Git, Braintree Payment Gateway
